

Device Technologies

Protecting Critical Equipment

Product Catalog No. 1219

Device Technologies, Inc.

Our dedication to meet our customer's needs has driven the growth of Device Technologies, Inc. year over year.

This focus enhances our preferred vendor status among our worldwide customers who are a broad cross section of industries such as Aerospace, Computer Servers, Information Technology and Storage, Defense and Tactical Equipment, Food Processing, Medical Equipment, Power Systems, Telecommunications, and Transportation.

This focus on customer needs is epitomized by our flagship product, **Spring-Fast®** wire protection grommet edging. Compared to Nylon and adhesive assemblies, it saves manufacturers at least 49% on installation costs, generates 9.5x productivity gains and still provides best in class performance—no matter what the industry. Even if our customers don't need the aerospace level performance they can still save money and boost productivity. Win-win!

Hector D. Petri
Founder
1922-2011

This has not happened by accident. Device Technologies has more than 85 years of specialty fastener, cable management and enclosure protection design expertise, vision, experience and perspective to create innovative solutions for the OEM and electromechanical product industry.

We never stop working to make our wire protection solutions more effective. We constantly develop new enclosure and cable related protection materials. We combine multiple technical disciplines such as precision stamping, thermoplastic and rubber molding and extrusion, linear polymer coating, injection molding, laminating, die-cutting and reel-to-reel processing. All supported by ongoing Lean principles and Continuous Improvement.

Our team of engineers and critical partners have pioneered and grown the high quality and performance-enhancing equipment protection solutions that are embodied in our grommet edgings, enclosure seals, thermal management, EMI shielding and absorbers, braided sleeving and more.

We continue our Founder's legacy of proven problem solving techniques for the OEM. We think outside the box to improve our current products and innovate new ones.

Most of our solutions are readily available off-the-shelf (COTS); however, we also offer the flexibility of customization. Whatever the approach, we stay focused on your overall operating efficiency and your business model—not simply on the specific process problem. Product quality and speed of assembly, combined with long term durability, reliability and collaborative support, are embedded in our design solutions that protect your competitive edge.

The result is product after product working systematically to cut effort, time, and expense from your manufacturing. Please visit our web site for new products and the latest Device Technologies news at

www.devicetech.com

Thank you for your interest in Device Technologies. We look forward to becoming a strong, strategic supplier partner, supporting your needs with an **ISO 9001** and **AS9100 Quality Management System**.

DTi Quality Statement

Device Technologies, Inc. considers Quality to be consistent conformance to customer requirements.

- To meet or exceed our customers' requirements for the quality of the products and services we provide.
- To improve the effectiveness of our Quality Management System processes and advance our use of technology continuously so as to enable our customers to become more efficient and profitable.
- To provide our employees with all necessary information, training, tools and support so that they can achieve our quality objectives.
- To treat all customers, employees, suppliers and our community with honesty and integrity.
- To conform to the requirements of ISO 9001 and AS9100 quality standards.

SpringFast®

Wire Protection Grommet Edging and Trim

Spring-Fast FM Series

Spring-Fast SL Series

Spring-Fast Mil-Spec
FAA Approved

Trim-Fast™ S Series

AP and BAP Series

Spring-Fast provides 49% cost savings, 950% productivity increase and best in class high performance. The fastest, safest, most reliable way to protect wires, cables, and tubing from abrasion. It locks on with finger pressure in seconds, eliminating solvents, adhesives, ancillary materials and volatile organic compound (VOCs). Spring-Fast installs continuously and is very flexible for use on sharp corners and curved edges, such as flanged holes.

Features for all Spring-Fast:

- Coated with abrasion resistant nylon thermoplastic
- UL94 V-0 flammability rating
- Compliant to: • RoHS • REACH • EWIS • FAR 25.853
- Eliminates adhesives
- For use on a wide range of panel thicknesses

BT Series

Spring-Fast “T” Series:

- Lowest profile (size) grommet
- Operating temperature range: -40°F to 285°F (-40°C to 140°C)
- For straight edges and inside and sharp outside corners

Spring-Fast “BT” Series:

- Includes a flexible polymer cushion for added abrasion protection
- Operating temperature range: -40°F to 185°F (-40°C to 85°C)
- For straight edges and inside and sharp outside corners

Spring-Fast “AP” Series:

- Greater gripping strength for severe shock and vibration environments
- Operating temperature range: -40°F to 285°F (-40°C to 140°C)
- Multi-axis flexibility for rounded inside and outside corners

FM Series

Spring-Fast “BAP” Series:

- Greater gripping strength for severe shock and vibration environments
- Includes a flexible polymer cushion for added abrasion protection
- Operating temperature range: -40°F to 185°F (-40°C to 85°C)
- Multi-axis flexibility for rounded inside and outside corners

Spring-Fast “SL” Series:

- Completely encapsulated in a flexible UL94 V-0 flame retardant polymer
- Operating temperature range: -67°F to 203°F (-55°C to 95°C)
- Added abrasion protection for wires and hands

Spring-Fast “FM” Series:

- Same characteristics as “AP” Series plus flush mounting on one side for flat panel surfaces
- Operating temperature range: -40°F to 285°F (-40°C to 140°C)
- Multi-axis flexibility for rounded inside and outside corners

Salt Spray Testing	MIL-STD-202F

Spring-Fast® Mil Spec grommet edging M22529/1 and M22529/2 were designed for the high performance needs of the defense industry. Used widely on airframes, tactical vehicles & ground based electronics.

Key Benefits:

- 49% reduction in total install costs (@ \$60 labor rate)
- 950% productivity improvement from reduced total process time
- Best-in-class performance

All Spring-Fast variants snap on in seconds for immediate wire routing – no fixturing, adhesive curing, clean up or inspections.

If you use glued in grommets, switch to Spring-Fast for significant savings and productivity gains

Features and Benefits:

- Spring steel substrate with thermoset polymer coating
- Simple snap-on install with finger pressure or roller
- Eliminates adhesives, safety and environmental concerns
- Holds fast without VOC adhesives
- Superior quality, finish and durability
- Adapts to materials, thicknesses & applications
- For straight edges, corners and holes
- Flexible and installs continuously
- M22529/2 offers cushioned crown wire interface

Applications:

- Penetrations, Cutouts and Edges
- Aluminum, Titanium, CRES or Composite Structures
- Use on Monolithic Machined, Laminated Composite or Sheet Metal Components, Electronic Pallets and Avionic Racks
- Protecting wire, co-ax, twisted pairs, and wave guides
- Any situation where wires/fluid lines pass thru structure & protection is required

Qualifications:

- NASM22529 qualified
- FAA approved
- UL94 V-0 compliant
- National stock numbers available (see page 19)
- FAR 25.853, Cage Code: 0HES0
- NAVAIR Per 01-1A-505-1 (./2)
- RoHS compliant

Spring-Fast SL AERO is fully encapsulated in a flexible polymer for added abrasion protection on multi-axial forms and penetrations. Used in high performance applications: aircraft structures/interiors, avionics systems, military vehicles, NASCAR vehicles, supercomputers, medical equipment and rail transit.

Key Benefits:

- 49% reduction in total install costs (@ \$60 labor rate)
- 950% productivity improvement from reduced total process time
- Best-in-class performance

All Spring-Fast variants snap on in seconds for immediate wire routing – no fixturing, adhesive curing, clean up.

If you use “glued” in grommets, switch to Spring-Fast for significant savings and productivity gains

Qualifications:

- FST Compliant
- RoHS and DFAR compliant
- Flammability FAR 25.853, ASTM E 162 & UL94 V-0
- Smoke Density ASTM E 662
- Random Vibration MIL-STD-102
- Mechanical Shock MIL-STD-810C
- Salt Spray (Corrosion) MIL-STD-202F
- Humidity MIL-STD-810F
- Immersion NASM22529
- Dielectric Withstanding Voltage NASM22529
- Low Temperature MIL-STD-810E
- Temperature Cycling MIL-STD-202G

Features and Benefits:

- Multi axis flexibility for flanged holes, inside and outside corners
- Indoor and outdoor use
- Operating temperature range: -67°F to 203°F (-55°C to 95°C)
- Eliminates adhesives, safety and enviro concerns
- Holds fast without VOC adhesives
- Excellent resistance to abrasion, water absorption, and low/high temperatures
- Improves ergonomics during assembly
- Spring steel substrate with polymer coating
- Simple snap-on install with finger pressure
- Superior quality, finish and durability
- Adapts to materials, thicknesses & applications
- Flexible and Installs continuously

Applications:

- Aerospace
- Military/Tactical
- Automotive
- Telecommunication/IT
- Medical
- General Industrial
- Rail/Transportation

Spring-Fast BAP Series was designed for greater gripping strength to cope with severe shock and vibration applications.

Key Benefits:

- 49% reduction in total install costs (@ \$60 labor rate)
- 950% productivity improvement from reduced total process time
- Best-in-class performance

All Spring-Fast variants snap on in seconds for immediate wire routing – no fixturing, adhesive curing, clean up or inspections.

If you use “glued” in grommets, switch to Spring-Fast for significant savings and productivity gains

Features and Benefits:

- Multi-axis flexibility for flanged holes and inside and outside radii.
- Continuous edge protection
- Excellent grip strength
- Holds fast without VOC adhesives
- Excellent resistance to abrasion, shock and vibration, low and high temperatures, and corrosion
- Fast assembly – no adhesives, rivets, or screws
- Operating temp. range: -40°F to 185°F (-40°C to 85°C)
- Eliminates adhesives, safety and enviro concerns
- Improves ergonomics during assembly
- Spring steel substrate with polymer coating
- Simple snap-on install with finger pressure
- Self-locking security
- Superior quality, finish and durability
- Adapts to materials, thicknesses & applications

Applications:

- Avionic instruments
- Auxiliary power units
- Airframe structure
- Bulkheads
- Cowling
- Dashboard
- Electrical avionic units
- Electrical power center
- In-flight entertainment
- Intercostal
- Lightening holes
- Personal safety units
- Seating
- Tail sections
- Wing ribs

Dielectric Strength per NASM22529, Section 3.2.1	1500 Volts at 60Hz
Substrate	Stainless Steel
Taber Abrasion Resistance	TPE Cushion: per D1044 1Kg load, C17 Wheel 25mg loss 1000 cycles
Finish	TPE Cushion
Salt Spray Hours per ASTM B117 MIL-STD-202, Method 301	2000 hours
Immersion	Per NASM22529 and Skydrol Compatible
Random Shock & Vibration	MIL-STD-1344, Method 2005.1 Test Condition VI, Letter J Duration 8 hours longitudinal and 8 hours perpendicular. rms G 41.7
Flammability	FAR 25.601, FAR 25.853 MIL-STD-202F, Method 111A UL94 V-0 File No. E113553 NZMT2
Fabrication Options	Factory pre-cut lengths or private branded kits Roll-Fast™ application tool Full Bypass Shears Spring-Fast Cutter Cart

Dimensions:

Due to sheet thickness tolerances and finishes, end user should determine product sizes by trial. When sheet thickness is at the maximum for the grommet chosen, end user may use a rubber mallet to set, or try the next size larger grommet.

Sizes

Product Size	T Sheet Thickness Inches (mm)	W Width Inches (mm)
0	0.020 - 0.030 (0.5 - 0.8)	0.19 (4.8)
1	0.029 - 0.045 (0.7 - 1.1)

 100' Reel (30.5m) ————
 Reel ————
 Coating: White Fushion Bonded Nylon ————
 with Grey Cushion

Features & Benefits for HIGH HEAT Spring-Fast:

- Snap on multi-axial mounting, no adhesive necessary
- Available on 25' or 100' foot reels or pre-cut lengths
- Lowest profile on the market
- Operating temperature up to 800°F
- UL94 V-0
- RoHS compliant
- FAR 25.853

Conformal stainless steel grommet edging

Spring-Fast “AP” Series: Great gripping strength for severe shock and vibration environments

Spring-Fast Specifications	HIGH HEAT Series Grommet
Axis Conformity	Multi
Operating Temperature Range	-40°F to 800°F (-40°C to 427°C) *Maximum 1,600°F (870°C)
Material	304 Stainless Steel
Finish	#2 Finish
Flammability	Not Applicable
Weldability	Weldable - Recommendations: LASER Weld; if filler is required use 308 Stainless Steel
Fabrication Options	Factory pre-cut lengths; Roll-Fast™ application tool; Full Bypass Shears; Spring-Fast Cutter Cart
* Above 800°F 304 Stainless Steel begins to precipitate out chromium carbides. This results in a decrease in corrosive resistance and ductility properties with time.	

Ordering Examples

AP Series on Reel

FM Series Factory Precut

An economical edge trim solution adding both a finished appearance and protection against abrasion.

Trim-Fast Edge Trims are available in a flexible steel or stainless steel substrate covered with Silicone, EPDM or PVC, allowing for fast and easy assembly for most environments.

Features and Benefits:

- Excellent grip strength
- Excellent resistance to abrasion
- Low and high temperature use
- Indoor and outdoor use
- Fast assembly without the use of adhesives, rivets, or screws
- Multi-axis flexibility
- Sheet thickness ranges up to 3/4" (19mm)

Applications:

- Automotive
- Railway
- Aerospace
- Food service (FDA white)
- Telecommunications
- Construction
- Marine
- General industrial

"S" Silicone Series

- FDA approved (White Silicone Material)
- Flame, Smoke and Toxicity compliant
- ASTM E 662 (Smoke Density)
- ASTM C 542 & ASTM C 1166 (Flame Propagation)
- BSS 7293 (Toxicity)

"S" EPDM Series

- FMVSS 302 (Flammability of Interior Materials)
- SAE J1885 (Interior Weatherometer)
- SAE J1960 (Exterior Weatherometer)
- SAE 200 M8BA 708 B13 21-6 (Low Temperature Flexibility)
- UL 50 and 50E Compliant, File Number JMST2.MH60351

"S" PVC Series

- Greater flexibility for small corner radii
- Smaller profile

Tool Kit

Part Number: 800TK includes all of the above

Spring-Fast Wire Protection Grommet Edging Installation Tool Kit combines all the installation tools you need to get the job done right when installing the NAS M22529/1 and NAS M22529/2 Composite Grommet Edging.

From measuring the chassis with the 'Go/No-Go' gauge to finishing the grommet to accommodate a nearby interference point with the Castle Removal Tool, this tool kit will improve productivity and quality compared to adhesive-applied grommets.

Packaged in a '5S' style Shadowbox for easy monitoring and control on the shop floor, the kit includes:

Sheet Thickness 'Go/No-Go' Gauge

Part Number 880 G

- Go/No Go gauge for all Spring-Fast sizes
- For sheet thicknesses from 0.020" to 0.260" (0.5mm - 6.6mm)
- Made from stainless steel

'Go/No-Go' Sheet Thickness Gauge
p/n 880 G

Full Bypass Cut Off Shears
p/n 830 PS (or MFE 100)

Adhesive Backed Bench Top Mount Measuring Scale

Part Number 860 GSB

- Adhesive backed for applying to work bench
- Measures in inches and castles
- 24" long (154 castles)

Full Bypass Cut Off Shears

Part Number 830 PS (or MFE 100)

- Quickly cuts Spring-Fast grommet and Trim-Fast™ edge trim, assuring a clean, burr-free cut.
- Prevents distortion of adjacent castles

Roll Fast™ Installation/ Application Roller
p/n 840 R

Castle Removal Tool
p/n 890 G

Roll Fast™ Installation and Application Roller Tool

Part Number 840 R

- Quickly installs Spring-Fast grommet edging
- 1/2" (12.7mm) outside groove diameter

Castle Removal Tool

Part Number 890 G

- Fast and easy operation for removing single castles
- Polished, forged steel cutting edge provides excellent longevity
- Ergonomic handles for comfortable operation
- Tool Weight: 0.22 lbs

Spring-Fast Scale

Tool Kit Part Number: 800TK includes all of the above

Seal-Fast™

High Performance Enclosures and Door Seals

Profile A

The Seal-Fast High Performance Edge Seal protects vital equipment from damage from environmental conditions by meeting critical industry standards, improves efficiency with high, long-term performance and a multi-axis, flexible fit. Fast Customization of profiles, mitering and vulcanizing of corners and film bonding of ends are also available.

A better, cleaner, and faster way to protect your equipment from environmental conditions; dust, low and high temperatures, and moisture.

Seal-Fast D Series Edge Seals are available in a variety of materials, which include a flexible steel or stainless steel substrate, Silicone, EPDM, or PVC gasket and seal assembly allowing for fast and easy assembly.

Features and Benefits:

- Excellent grip strength
- Excellent resistance to abrasion, water absorption, and low and high temperatures
- Indoor or outdoor use
- Fast assembly without the use of adhesives, rivets, or screws
- Multi-axis flexibility for small inside and outside radius corners

Applications:

- Automotive
- Railway
- Aerospace
- Food service (FDA white)
- Telecommunication
- Construction, mining, and forestry
- General industrial

Profile B

“D” Silicone Series

- Flame, Smoke and Toxicity Compliant per:
 - ASTM E1354 (Cone Calorimeter), EN 45545-2
 - ASTM E662 (Smoke Density), EN 45545-2
 - ASTM C542 & C 1166 (Flame Propagation), EN 45545-2
 - BSS 7239 and SMP800C (Toxicity), EN 45545-2
- FDA Approved (White Silicone)

“D” EPDM Series

- FMVSS 302 (Flammability of Interior Materials)
- SAE J1885 (Interior Weatherometer)
- SAE J1960 (Exterior Weatherometer)
- SAE 200 M8BA 708 B13 21-6 (Low Temperature Flexibility)
- UL 50E Compliant, File Number JMST2.MH60351

“D” PVC/EPDM Series

- Greater flexibility for small corner radii
- Smaller profile

Additional and custom sizes available, please consult website, factory or DTi Tech Rep for details or evaluation samples.

Plate Seals protect against chafing and abrasion while sealing out fumes, heat, dust moisture and other contaminants. Used to manage and support cables, hoses, hydraulic, fuel and oil lines, as they are routed through bulkheads and openings and isolate from sharp edges. Typically mounts with screws and rivets or with adhesives, by special order. Available in standard off the shelf (COTS) and custom trim rings to fit myriad of applications.

Features and Benefits:

- Fast and easy to install with use of screw, rivets, or optional PSA
- Encapsulated to keep unwanted contaminants from entering through hole or cutout area
- Enhances appearance
- No need for extended cure time adhesives or other auxiliary material
- Accepts a wide range of cable diameters
- UV and ozone resistant
- Excellent resistance to abrasion, compression set, flex cracking, impact, tear, and vibration

Applications:

- Aircraft galley equipment
- Avionics
- Bulkhead
- Automotive
- Railway
- Telecommunications
- Marine
- Trailers and motor homes
- General industrial

Performance:

- Resistant to fluids (solvents, fuels, and oils) per MIL-R-3065D, MIL-R-6855, and MIL-R-2765
- Continuous operating temperature: -50°F to 320°F (-45°C to 160°C)
- Intermittent operating temperature: -70°F to 400°F (-57°C to 204°C)
- Flame retardant rubber also available.

Product Sizes per Product Type:

- For hole diameters and cutouts from 1" to 5" (25.4mm to 127mm)
- For standard cable bundles or hose diameters from 0.25" to 1.5" (6.4mm to 38.1mm)
- Choose seal inside diameter that is 1/16" to 1/8" (1.59mm to 3.18mm) smaller than bundle/hose diameter.
- Largest bundle/hose diameter should be at least 3/8" (9.53mm) less than seal outside diameter.
- Custom solutions per application

Faster Fiber Management Solutions

Fast-Drop Fiber Bend Radius Control Modules provide the BICSI recommended minimum bend radius for fiber optic cables, assuring consistent data transmission. Molded of UL94 V-0 flame retardant, impact resistant polycarbonate and rigid enough to withstand large bundle loads. NEBS compliant.

The universal Fast-Drop quickly snaps on to any panel edge up to 0.104" (2.7mm), retained by a RoHS compliant plated steel slip. May be screw or tab mounted to the cabinet to make service loops and or preassembled assembly per the Rack Mount Panel Array or Coiling Clip or stacking via slotted side design.

Patch Panel Egress

Service Loop/Take-up Reel

Fast-Drop 360° Fiber Routing Module

Features and Benefits:

- Protects cables from kinks
- Fits within standard unit racks
- Snaps into place
- Hook and loop strap containment option
- Flame retardant per UL94 V-0
- RoHS compliant
- Versatile assembly options
- Protects cables and tubing from kinks and micro bends

Applications and Uses:

- Fiber - FTTH or FTTP cabling
- Patch panels, control boxes
- Racks, cabinets, and enclosures
- Data centers/central
- Telecom switches and base stations
- Medical, x-ray, and imaging equipment
- Industrial equipment, Electrical wiring,
- Hydraulic, pneumatic and tubing/hoses

Rack Mount Fiber Array Panel

Part No. 321-FAV-1B-SL-HL

Part No. 321-FAV-1B-6-L-HL

Part No. 321-FAV-1B-3/3-OUT-HL

Specifications:

RoHS compliant plated steel clip retains Fast-Drop securely on up to 0.104\" (2.7mm) sheet thickness.

Material: Polycarbonate
Flammability: UL94 V-0
Color: Black or Beige
Typical Wall Thickness: 0.090\" (2.3mm)

Mounting Options:

Side Screw Mounting

Drill one hole per drill pattern above. Insert first screw and mount Fast-Drop. Use Open slot to spot and drill the second hole and insert second screw.

Vertical Tab Mounting

P/N	H
321-1	0.94\" (2.4mm)
321-2	1.34\" (3.4mm)
321-3	1.94\" (4.9mm)

Optional: Include slot tab to lock clip in place.

The Low Profile Cable Tie and the Push-Mount Cable Tie System are designed for fast and easy assembly with no need for mechanical fastener reducing installation time and costs. It quickly secures and positions wire bundles, cables, and hoses, to panels. Extra stability is created from the push mount head design, which is contained, keeping cable ties from sliding during installation and application.

The cable tie has a low head height compared to standard designs increasing safety and eliminating snags, and cuts and abrasions to wires, cables, and hoses. The cable tie can be removed and replaced fast and easily by cutting the top crossbar.

Features and Benefits:

- Reduction of installation time and its associated costs
- Low-profile, tamper-proof cable tie
- Rated for indoor and outdoor use
- Flame retardant per UL94 V-2
- RoHS compliant
- Operating temperature range L
- -40°F to 185°F (-40°C to 85°C)

Applications:

- Cell towers Aerial support
- Telecommunications
- Transportation

Tolerances:

.xxx = ±0.005, .xx = ±0.015

Packaging:

Sealed poly bag in quantities of 100, 1000, or customer specified up to 1000 pieces

Color Codes:

Black (00) and Natural (09)

Hook & Loop Simple Straps and HLWS Wrap Strap are self-gripping fasteners that offer a neat and secure way to manage cable and fiber bundling.

Features and Benefits:

- Flame Retardant per UL94-V2
- ROHS Compliant
- Burn Resistance per MVSS302

Applications:

- Cable and Fiber Management
- Gaming Equipment
- Telecom/IT-Storage
- Medical
- Avionics
- Automotive /Transportation
- HVAC & Air Handling
- General Industrial

321 L Series Simple Straps

Qualifications:

- Fire and smoke resistant per: FAR 25.853F, part (a), (l), (i) vertical 60 second burn and (ii) 12 second burn
- Acceptance per NEC 300-22, paragraph (c) and (d)
- CAT 6
- Max Temp: 122deg F (50 deg C)
- Load capacity: 18lbs
- Contact area: 0.73in² (4.84cm²)
- Shear force: 23 p.s.i.

Protect-Fast™ Braided Sleeving is an efficient solution allowing for easy installation of wires or bundles of cable. It is a tough, lightweight method used to contain and protect cable assemblies, hoses and wire harnesses from abrasion and cutting.

- Aerospace
- Automotive
- Avionics
- Cooking Equipment
- Datacenters
- HVAC
- Medical
- Military
- Power Equipment
- Solar Control panels
- Telecom
- In-Flight Entertainment systems
- PFI-HLW Wrap, made from tightly woven ballistic Nylon, is designed with an Oversize Hook & Loop Closure for industrial applications exposed to constant and extreme use often in harsh environments.
- PFHH-NMX High Heat sleeving protects under intense heat up to 662°F. The Nomex® fireproof braided sleeving, with tensile strength of 90,000 psi is impervious to short term exposure to gasoline and most engine chemicals. Cuts easily with scissors and is soft and pliable for easy installation.

Features and Benefits:

PFF-EI-A

Protect-Fast™ ELECTRICAL Fiberglass sleeving, with optional Acrylic or High Heat Silicone coating, provides superior electrical insulating performance with high abrasion and fatigue resistance.

- Transformers
- Relays
- Power Supplies
- Electrical Systems

Protect-Fast™ GSX Electrical Fiberglass sleeving, with heat annealed, tightly braided fiberglass to remove organic impurities and improve handling. Used on LOW VOLTAGE, high heat applications with non-fraying properties

- Toasters, Heaters & Appliances
- Rotors & Stators
- Replaces Asbestos

Thermal Interface Material

Device Technologies' Conductive Silicone gasketing can be used where high conductivity, excellent shielding, and long term stability is needed. The conductive silicone is filled with metal filler and is manufactured in molded types, extruded types, and sheets.

Features and Benefits:

- UL94 V-0
- Excellent electrical conductivity
- Made from durable conductive silicone
- RoHS Compliant and Halogen Free

Applications:

- Telecommunications
- Navigation systems
- Entertainment systems
- Satellite radio receivers
- Medical equipment

Universal and Continuous Grounding Panel Fastener

Device Technologies' Ground-Fast grounding system quickly attaches a lid or cover to a panel, protecting printed circuit boards and electronics components. The fastener combines mounting clips, which quickly snaps into holes to create an electrical ground contact from the lid to the panel.

Features and Benefits:

- Flush surface mounting
- Fast snap-in or solder attachment
- Fast removal of lid from panel
- High closure force
- High tensile strength

Material:

- Type 304 Stainless Steel

Electrical Resistivity:

- $28.4\mu\Omega\text{-in. @ } 68^\circ\text{F}$ ($72\mu\Omega\text{-cm @ } 20^\circ\text{C}$)

Backplane I/O

Mobile phone

Various profile options

The G Series consists of a conductive fabric on a highly compressed polyurethane foam core with a conductive adhesive tape. Excellent flexibility with superior adhesive strength guarantee a precise fit on uneven surfaces.

DTI's G Series also offers a gold fabric option, providing increased conductivity and minimum oxidation compared to nickel or silver fabrics.

Available with halogen-free and flame retardant adhesives.

Features and Benefits:

- UL94V-0
- RoHS compliant
- Excellent flexibility
- Superior adhesive tape
- Easy to cut and install
- Available in customer specified width & height
- Std. length - 1 meter or cut to length

Applications:

- Mobile phones
- Backplanes
- Navigation systems
- Entertainment systems
- Satellite radio receivers
- Telecommunication systems
- I/O panel connector

FA Series EMI Absorber materials provide suppression of electromagnetic waves covering a wide frequency range and excellent suppression of radiated and conduction noise, as well as electrical surge

Features and Benefits:

- Wide frequency range: 5MHz to 20GHz
- Thin, lightweight, and flexible
- High electrical resistance
- Excellent internal interference suppression
- Easily die cut to custom specifications

Applications:

- Personal computers
- Mobile phones
- LCD cables
- Military equipment
- Consumer electronics
- Appliances
- Laboratory instrumentation
- Telecommunications

Optimum performance in today's electronics requires among a variety of things the efficient and effective transfer of heat away from component heat source to the ambient environment. Component surfaces are microscopically rough and un-smooth creating contact voids and poor heat transfer characteristics. DTI's thermal interface material fills microscopic interstitial air gaps to optimize the heat energy transfer/spread/dissipation process. Various solutions from 1.5 W/m-K to 12 W/m-K and 0.13 mm to 10.0 mm thick.

DTIM Series materials are silicone based, contain a high ratio of thermally conductive ceramic fillers, combining high thermal conductivity, flame retardant properties for heat resistance and electrical insulation.

Silicone based thermal interface materials contain a high ratio of thermally conductive ceramic fillers. They exhibit outstanding thermal conductivity because they conform well in the gap between the heat generating device and the heat-sink.

Features and Benefits:

- UL94V-0
- Highly compressible
- Low thermal impedance
- Inherently sticky, but optional adhesive tape available
- Stable from -30°C to 200°C

Applications:

- Micro Processors
- Memory Chips
- RDRAM Modules
- High Speed Storage Devices
- Telecommunications Hardware
- Automotive Engine Control Units

How DTIM Thermal Interface Materials work:

DTIM G0, G1, & G2 Gels and Sheet:

Without DTIM material contact between two surfaces can contain up to 90 percent air filled voids which resists heat transfer.

Adding DTIM G0, G1, G2 or US material closes air filled voids and optimizes heat transfer.

DTIM G3 Sheet:

DTIM G3 material intercepts vertical heat transfer and spreads heat horizontally.

ST Series Single Sided Conductive Tapes are composed of a conductive fabric substrate and highly conductive pressure sensitive adhesive (PSA). They offer a thin light weight and flexible shielding design and are ideal for sealing enclosure seams on non-metallic electronic enclosures or wrapping cables.

Features and Benefits:

- Excellent shielding effectiveness
- Highly flexible
- Can be die cut to custom shapes

Applications:

- Computer/IT
- General electronics
- Medical equipment
- Automotive
- Control boxes

Application Techniques:

- Bonding surfaces must be clean and dry. Isopropyl alcohol is recommended to pre-clean. Bond strength can be increased by applying with a roller or finger pressure to exclude air entrapment.
- Adhesion is optimized when substrates are flat and or conformable, temperatures are between 60 -100 (15 C to 38 C) and given a 24 hour cure cycle. Tape application below 50 deg F is not recommended. Warming substrate to 100 F (38 C) facilitates adhesion (not required)

DT Series Double Sided Fabric Tapes

DT Series Double Sided Conductive Tapes are composed of a conductive fabric substrate and highly conductive pressure sensitive adhesive (PSA) laminated on both sides. They offer a thin light weight and flexible shielding design while providing superior mechanical, electrical and adhesive properties.

Features and Benefits:

- Excellent shielding effectiveness
- Highly flexible
- Lengths of 25 or 50 meters
- Can be die cut to custom shapes

Applications:

- Computer
- Telecommunications
- General electronics
- Medical equipment
- Automotive

SMT & DMT Series Metal Foil Adhesive Tapes

The SMT and DMT Series Metal Foil Adhesive Tapes are produced using highly conductive adhesives laminated onto thin copper or aluminum rolls and then either sheeted or sliced into custom, typically 1"= 6" (25.4 mm to 152.4 mm) width rolls. Cost effective, light weight, thin and flexible shielding solutions.

Features and Benefits:

- Excellent shielding effectiveness
- Copper or aluminum foils
- Corrosion resistant
- Single or double sided construction

Applications:

- Wire harnesses
- Grounding
- Sealing seams

Conductive Tape	Conductive Tape

To meet the increasing microprocessor speeds of today's equipment, Shield-Fast's FS Series Conductive Cushion gaskets offer an innovative approach to traditional shielding/grounding with an X,Y and Z conductance capability, thereby enhancing shielding effectiveness. Construction is with either Ni-Cu plated Polyurethane (F01) or Polyolefin (S01) foam, and laminated with conductive fabrics. The F01 polyurethane foam has a 40% lower compression set than the S01 polyolefin foam.

Features and Benefits:

- Flammability per UL94
- Superior shielding effectiveness combined with Shock Absorption
- Excellent conductivity-deflection rate
- Easy installation with or without conductive PSA
- Wide temperature capability – 30°C to 90°C

Applications:

- Wireless device displays and speaker cutouts
- Grounding between PCB and chassis
- PCI bracket
- Medical equipment
- Telecommunication equipment
- Automotive
- Appliances
- Computer and Servers

FS Series Specifications Conductive Fabric Material

Specification	FS12C	FS12C23	FS9
Foam Type	F01	23F01	
Foam Description	Conductive Polyolefin Fabric Foam with Ni-Cu-Ni and high strength modified conductive tape	Conductive Polyolefin Fabric Foam with Ni-Cu-Ni and high strength modified conductive tape	Conductive Cushion Tape
Tape Type	DTNWT Conductive Adhesive DTNWT Fabric Conductive Adhesive Release Paper	DTWTF Conductive Adhesive DTWTF Fabric Conductive Adhesive Release Paper	Conductive Polyurethane Foam Conductive Adhesive Release Paper
Contact Resistivity (Ω /sq.)	Max 0.1		Max 0.1
Shielding Effectiveness (dB)	Min. 60		Min. 70
Adhesive Strength (gf/25mm)	Min. 1000		Min. 1000
Thickness Options (mm (inches))	0.4 (0.016) ~ 1.7 (0.067)	0.4 (0.016) ~ 1.6 (0.063)	0.3 (0.012) ~ 1.0 (0.039)

FS12 Conductive Foam Properties

Property	Polyurethane Foam F01	Polyolefin Foam S01
Density	2.81 lb/ft ³ (45 kg/m ³)	28.1 lb/ft ³ (450 kg/m ³)
Tensile Strength	≥28.4 psi (2.0 kgf/cm ²)	583 psi (40.0 kgf/cm ²)
Elongation	≥100%	≥31%
Tear Strength	≥0.0057 lbf/in (1.0 N/m)	-
Compression Set	≤10%	≤50%
Flammability	UL94 HBF	None

Typical Shielding Effectiveness

Device Technologies is an industry leader in the manufacturing and designing of specialty protection devices and services including:

- Wire protection grommet edging
- Enclosure edge trims
- Edge seals
- EMI/RFI shielding gaskets
- Cable sleeving and Wraps
- Fiber radius control modules
- Linear reel-to-reel polymer coating

These products are manufactured for diverse industrial applications under the combined Quality System governed by ISO 9001:2008 and AS9100.

The AS standard is an Aerospace Standard analogous to the TS16949 Automotive Standard.

Other specifications DTI products are qualified to included FMVSS302, Mil Std M22529, ARINC 628 p5 as well as ASTM, SAE and BSS specifications.

DTI offers full awareness, capabilities and compliance to meet various Quality System requirements including PPAP processes and related manufacturing and inspection requirements.

The PPAP process is designed to demonstrate that the component supplier has developed their design and production process to meet the client's requirements, minimizing the risk of failure by effective use of APQP (advanced product quality planning).

Our customers include major OEM's in global markets.

Automotive	Nissan 	Bose 	Volvo 	Land Rover 
Telecom/IT	Nokia 	Cisco 	Ciena 	Ericsson 
Aerospace & Rail	Lockheed 	Boeing 	Siemens 	DRS

For three decades, Device Technologies has been powder coating linear (reel-to-reel) substrates for its own Spring-Fast® line of wire protection grommet edging. The powder coatings work so well for us, we've decided to offer linear powder coating services to other industrial users.

Our powder coating method is a unique, reel-to-reel process. It applies thermoplastic resins such as nylon and polyethylene, or thermoset resins such as polyester and epoxy to linear metallic substrates such as wire, cable, stampings, or steel strip. The coating can be applied to the entire surface, or selectively to part of the surface creating functional and/or decorative finishes.

Capabilities and Features of Our Powder Coating Service

The near 100% transfer efficiency rate of Device Technologies' process delivers a fast and efficient application of a smooth, protective coating to a variety of wire, cable, stampings and metal strip. Functional finishes include end products that require durable surface protection for electrical insulation or corrosion resistance. Decorative finishes are also durable and can be used to create virtually any color as well as special effects.

Selectively Coated

- Thermoset and thermoplastic resins
- Specialty electrical insulation and corrosion resistant coatings
- Decorative coatings
- Flexible coatings
- Full and selective coating
- Depositions from light dusting to heavier builds

We at Device Technologies collaborate with our customers to develop new products and provide value engineering solutions from concept and design through manufacturing, verification, and validation in accordance to our AS and ISO quality process standards. Our solutions are developed to perform and provide a particular function or set of functions effectively and reliably and to be manufactured economically for our customers. Our collaborative solutions include, but are not limited to, wire abrasion protection, cable management, enclosure sealing and EMI / RFI shielding.
